

WATER CONSERVATION UPDATE

Dear Water Customer,

In response to the State Water Board's mandate that we reduce our water use by limiting outdoor irrigation and preventing water waste, you responded and are doing your part. You have helped make an impact by doing your part. **Due to your efforts, together we are closer to reaching our goal. Thank you!**

Here is a brief update to let you know what we're doing together to conserve our most precious resource and preserve our quality of life, while adapting our landscapes to better fit our natural climate.

See reverse for details

State Water Board reduces TCWD's Conservation Goal from 32% to 28%!

Initially, our district was given the mandatory conservation goal of reducing our water use by 32%. At the time, we immediately started working to ensure the accuracy of the State's calculations and goals set for our district. Specifically, we demonstrated to the State that Trabuco Canyon Water District's customers have a lower per capita per day usage, therefore placing the district at a lower conservation goal. To further prove this point, our water operations emphasized water production efficiencies. After contacting the State Water Board about our concerns, we were given a short window and one opportunity to make our case. We revisited every calculation, performed our due diligence and presented updated reports and findings by our deadline in May. This was a technical and complicated process.

THE RESULT:

Our mandated conservation goal was reduced to 28%!

June Results: Off to a Great Start!

Thanks to your efforts we experienced a reduction in our total water consumption by 26% in June. Keep up the excellent work!

Looking Ahead

We want to encourage you to continue making water conservation a priority. We have been fortunate to have experienced cooler weather over the past few months, which has helped. Some hot months are ahead, in addition to Santa Ana winds that tend to dry out grass and plants.

32003 Dove Canyon Drive, Trabuco Canyon, CA 92679

Thank you for all you have done and continue to do to save water. In addition to your efforts, we are currently adding new recycled water users and capturing new sources of runoff. **We're in this together.**

Sincerely,

Hector Ruiz
General Manager
Trabuco Canyon Water District
